

TATTOO AFTERCARE – DERM SHIELD

First Application

Your artist applied the first Derm Shield after your tattoo was completed. This larger piece allows for ink and plasma buildup and helps prevent leaking.

Second Application (After 24 Hours)

You were given a second Derm Shield to apply after 24 hours.

If you need help applying it, feel free to stop by the shop — we're happy to help.

HOW TO APPLY

- Remove the first bandage in the shower to loosen the adhesive.
- Peel slowly from a top corner, pulling downward.
 - (gooey buildup is normal.)
- Wash the tattoo gently with mild, fragrance-free soap.
- Rinse well, allow to air dry and pat dry with a clean paper towel.
- Wash your hands, then apply the new Derm Shield from the center outward.
- Do not stretch the bandage.
- Remove the clear top layer by pulling in the direction of the arrows.
- Wear for 3–4 days.

If redness or irritation occurs, it is okay to remove the bandage.

Note: Derm Shield is waterproof for showering.

Do NOT submerge (no baths, swimming, or hot tubs).

AFTER DERM SHIELD REMOVAL

- Clean tattoo gently with mild soap and water a few times daily while healing.
- Apply a thin layer of moisturizer (Aquaphor or A&D) after cleaning.
- Peeling and itching are normal - Do NOT scratch, pick, or exfoliate

Proper aftercare helps your tattoo heal cleanly and keeps it looking its best.
